EXPERIENCE

Frontend Developer | ApexPlanet Software Pvt. Ltd.

Shoe Garden (Footwear E-Commerce Concept Website)   06/2025 – 07/2025

· Designed and developed a visually appealing footwear-themed website using **HTML, CSS, and JavaScript**.
· Built fully responsive pages optimized for mobile, tablet, and desktop screens.
· Added dynamic UI interactions, product listings, and streamlined navigation.
· Improved design consistency, accessibility, and overall user experience.

PROJECT

Frontend Developer | FarmEasy (Agricultural Equipment Rental Platform)

· Developed the frontend for a platform that allows farmers to rent equipment from local owners.
· Built reusable and modular UI components using **React.js** for better performance.
· Implemented responsive layouts, routing, and form handling for smooth user experience.
· Contributed to user flows for listings, rental details, and booking features.
· Ensured mobile-friendly design, efficient rendering, and clean UI/UX.

Frontend Developer | Cleaning Zone (Home Cleaning Services Website | Team Project)

· Collaborated in developing a home-cleaning service website using **HTML, CSS, and JavaScript**.
· Designed responsive pages and service sections with modern layout techniques.
· Added interactive elements like service categories, booking information, and navigation menus.
· Enhanced usability, visual consistency, and performance across various screen sizes.
